State of Global Happiness

Inference 1: The happiest countries are located in North America, Europe and Australia; whereas the least happy countries are centered in Africa and the Middle East regions.

Inference 2: Consistency between freedom to make life choices, social support, generosity and healthy life expectancy; and overall higher scores in all categories contribute to happier populations (countries).

Inference 3: Greater variances between freedom to make life choices, social support, generosity and healthy life expectancy; and particularly low scores for freedom to make life choices and generosity contribute to less happy populations (countries).
